

XM Radio is the best service to come along since the internet. You always have great reception anywhere you go at any time. Now with weather and traffic reports at the push of a button it's almost like being in the 21st century. Traveling across the country looking for a station every 30-60 minutes is a thing on the past!

The National Association of Broadcasters has had a way of doing business for many decades, and then technology and progress changes everything.

Thank God for the constant and never ending improvements mankind can accomplish.

I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.
